**DETAILED ACTION**

***Continued Examination Under 37 CFR 1.114***

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 12/11/2003 has been entered.

**Examiner's Amendment**

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. Harry B. Shubin (Reg. No. 32,004) on 03/18/2004.

The application has been amended as follows:

Art Unit: 2872

Claims 1, 51 and 58 have been amended in order to distinguish the claimed invention over the prior art.

The claims now read as follows:

1. (Currently Amended) A photonic device comprising:  
a first section including an optical material,  
a second section including an optical material, with an area of said first section and an area of said second section abutting each other,

wherein at least a part of said first area and a part of said second area define a low temperature bonding area, said first section and said second section being joined together by an interlayer which comprises a cured phosphorous-containing solution and wherein said first section and said second section form a waveguide.

51. (Currently Amended) A photonic device comprising:  
a first section including an optical material,  
a second section including an optical material,  
with an area of said first section and an area of said second section abutting each other and

Art Unit: 2872

at least a part of said first area and a part of said second area defining a low temperature bonding area comprising a condensed phosphate layer,

wherein said photonic device defines a three-dimensional waveguide structure comprising first and second portions extending perpendicular to each other.

58. (Currently Amended) A photonic device comprising:

a first section including an optical material,

a second section including an optical material,

with an area of said first section and an area of said second section abutting each other and

wherein at least a part of said first area and a part of said second area define a low temperature bonding area and wherein said low temperature bonding area comprises [a bonding material being bondable at room temperature] a cured phosphorous-containing solution.

#### **Reasons for Allowance**

Claims 1-58 are allowable over the prior art for at least the reason that the prior art fail to teach or reasonably suggest the cured phosphorous-containing solution or the

Art Unit: 2872

condensed phosphate layer as set forth in the claimed combination.

### **Conclusion**

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
